

Sub 1
A1
1. (Once Amended) A steer axle assembly, comprising:
an axle beam disposed about a longitudinal axis; and,
an inverted knuckle yoke having a body portion and first
and second arms extending from said body portion, said first and
second arms configured to received a kingpin;
wherein said body portion is coupled to an external surface
of said axle beam and said body portion is disposed on only one
side of said longitudinal axis of said axle beam.

Sub 2
A2
8. (Once Amended) The assembly of claim 16 wherein said
body portion is welded to an external surface of said axle beam.

Sub 3
A3
10. (Once Amended) The assembly of claim 16 wherein said
body portion is disposed on only one side of said longitudinal
axis of said axle beam.

A4
11. (Once Amended) The assembly of claim 16 wherein said
body portion extends from said axle beam in an outboard direction
and at an angle to said longitudinal axis of said axle beam.
